

YOUR BOOTS ON THE GROUND

THE OSINTO SCOUTING SERVICE

Osinto 

INCREASED COVERAGE

Let us help expand the footprint of your global scout network with our UK-based aviation and aerospace experts. Our team are entrepreneurs and pilots - as comfortable talking to start-ups as we are to aerospace engineers and investors.

We live and breath aviation and aerospace - leverage our knowledge and insights

Scouting-as-a-service - pay for our sourcing expertise only when needed

Track record - we've found dozens of companies for European investors

Trusted, honest and reputable - credible and reliable professionals

OUR FOCUS AREAS

We track start-ups, innovation and investments across four key areas of aviation and aerospace innovation.

URBAN AIR MOBILITY - electric vertical takeoff and landing or eVTOL aircraft are set to change the face of aerial mobility across cities and regions worldwide. From airspace integration to infrastructure development we're tracking the progress of an industry predicted to be worth \$1.5 trillion by 2040.

SUSTAINABLE AVIATION - as the global environmental movement gathers pace the spotlight is firmly on the aviation industry to reduce their emissions in the era of 'flight-shaming'. We're monitoring developments in everything from hybrid and electric propulsion to efficiency in aircraft maintenance and carbon-offsetting.

DRONES / UAVS - the most transformative commercial applications for UAVs - like drone delivery and remote monitoring - might only be realised when these aircraft operate beyond visual line of sight ('BVLOS') - we're following the companies at the forefront of this exciting area of aerospace innovation.

NEW SPACE - from satellite mega-constellations delivering broadband services from low Earth orbit (LEO) to innovative ride-sharing launch services, we're monitoring the growth of the commercial space industry.
